DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over SHIBAZAKI ET AL (US 5442899).

SHIBAZAKI ET AL discloses a strapping machine for positioning a strap around a load(A15) in which a chute (A4) is attached to a frame, a strap is guided around the chute and then the leading edge is welded to a second area of the strap by means of a strapping head (A12), and the strap is tightened and then sealed to itself.

SHIBAZAKI ET AL does not disclose the specifics of the movable walls or the brush. However, the use of adjustable / movable internal and/or external walls/panels to provide the most effective housing for machinery is well known in the mechanical arts and it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of SHIBAZAKI ET AL in the manner claimed in order to provide the most effective housing the interior of the machine so that operators can access and troubleshoot as necessary.

Regarding the brush, it is well known in the mechanical arts to brush clean a web or tape, such as the brush in a cassette tape player, and it would have been obvious to one of ordinary

skill in the art at the time the invention was made to add a brush to the invention of SHIBAZAKI ET AL in order to ensure a clean workable web surface.
